Description: The Oregon Coast Railroad is a switching layout working the industrial area of North Portland, Oregon. Operations are yard transfer and industry switching. Modeled activities include an ocean terminal, a small harbor/cannery area, a large meatpacking plant, a large paper mill and a modest yard. Layout height is 30" designed so operators can work while seated in rolling chairs =, All turnouts are hand thrown. Layout control is duplex Digitrax. The layout is featured in Model Railroading Planning 2026.
